(54) Title: METHODS FOR INCREASING NEISSERIA PROTEIN EXPRESSION

(57) Abstract: The present invention broadly relates to polynucleotide sequences encoding porin polypeptides of *Neisseria*. More particularly, the invention relates to nucleic acid sequence mutations in polynucleotides encoding PorA polypeptides of *Neisseria meningitidis*, wherein these sequence mutations result in increased expression levels of PorA polypeptides.

For two-letter codes and other abbreviations, refer to the "Guidance Notes on Codes and Abbreviations" appearing at the beginning of each regular issue of the PCT Gazette.

INTERNATIONAL SEARCH REPORT

International application No.

PCT/US2004/000800

Box No. I Nucleotide and/or amino acid sequence(s) (Continuation of item 1.b of the first sheet)

1. With regard to any nucleotide and/or amino acid sequence disclosed in the International application and necessary to the claimed invention, the International search was carried out on the basis of:
 - a. type of material
 - ☒ a sequence listing
 - ☐ table(s) related to the sequence listing
 - b. format of material
 - ☒ In written format
 - ☒ In computer readable form
 - c. time of filing/furnishing
 - ☒ contained in the International application as filed
 - ☒ filed together with the international application in computer readable form
 - ☒ furnished subsequently to this Authority for the purpose of search
2. ☒ In addition, in the case that more than one version or copy of a sequence listing and/or table relating thereto has been filed or furnished, the required statements that the information in the subsequent or additional copies is identical to that in the application as filed or does not go beyond the application as filed, as appropriate, were furnished.
3. Additional comments:

INTERNATIONAL SEARCH REPORT

International application No.
PCT/US2004/000800

Box II Observations where certain claims were found unsearchable (Continuation of item 2 of first sheet)

This International Search Report has not been established in respect of certain claims under Article 17(2)(a) for the following reasons:

1. ☒ Claims Nos.:
because they relate to subject matter not required to be searched by this Authority, namely:
see FURTHER INFORMATION sheet PCT/ISA/210
2. ☒ Claims Nos.: 2, 4, 6, 8, 27, 28, 40-43, 88-95, 99, 100, 103
because they relate to parts of the International Application that do not comply with the prescribed requirements to such an extent that no meaningful International Search can be carried out, specifically:
see FURTHER INFORMATION sheet PCT/ISA/210
3. ☐ Claims Nos.:
because they are dependent claims and are not drafted in accordance with the second and third sentences of Rule 6.4(a).

Box III Observations where unity of invention is lacking (Continuation of item 3 of first sheet)

This International Searching Authority found multiple inventions in this International application, as follows:

1. ☐ As all required additional search fees were timely paid by the applicant, this International Search Report covers all searchable claims.
2. ☐ As all searchable claims could be searched without effort justifying an additional fee, this Authority did not invite payment of any additional fee.
3. ☐ As only some of the required additional search fees were timely paid by the applicant, this International Search Report covers only those claims for which fees were paid, specifically claims Nos.:
4. ☐ No required additional search fees were timely paid by the applicant. Consequently, this International Search Report is restricted to the invention first mentioned in the claims; it is covered by claims Nos.:

Remark on Protest

- ☐ The additional search fees were accompanied by the applicant's protest.
- ☐ No protest accompanied the payment of additional search fees.

FURTHER INFORMATION CONTINUED FROM PCT/ISA/ 210

Continuation of Box II.1

Although claims 88-97 are directed to a method of treatment of the human/animal body, the search has been carried out and based on the alleged effects of the composition.

Continuation of Box II.2

Claims Nos.: 2, 4, 6, 8, 27, 28, 40-43, 88-95, 99, 100, 103

Present claims 2, 4, 6, 8, 27, 28, 40-43, 88-95, 99, 100, 103 relate to polypeptides sequences SEQ ID NOs: 2, 4, 14, 16 and 25, encoded respectively by polynucleotide sequences SEQ ID NOs: 1, 3, 13, 15 and 24. However, in the sequence listing filed with the application sequences SEQ ID NOs: 2, 4, 14 and 16 are not encoded by sequences SEQ ID NOs: 1, 3, 13 and 15 and, furthermore, they do not have the amino acid Ile in residue 18 as claimed.

The sequence presented in the sequence listing as SEQ ID NO: 25 is encoded by SEQ ID NO: 24 and has the amino acid Ile in position 18. Therefore, the search has been limited to polynucleotide sequences SEQ ID NOs: 1, 3, 13, 15 and 24 wherein codon 18 is other than ATC and polypeptide sequence SEQ ID NO: 25, wherein residue 18 is other than Ile.

The applicant's attention is drawn to the fact that claims relating to inventions in respect of which no international search report has been established need not be the subject of an international preliminary examination (Rule 66.1(e) PCT). The applicant is advised that the EPO policy when acting as an International Preliminary Examining Authority is normally not to carry out a preliminary examination on matter which has not been searched. This is the case irrespective of whether or not the claims are amended following receipt of the search report or during any Chapter II procedure. If the application proceeds into the regional phase before the EPO, the applicant is reminded that a search may be carried out during examination before the EPO (see EPO Guideline C-VI, 8.5), should the problems which led to the Article 17(2) declaration be overcome.
